

AI-Based Fake Identity & Document Screening System

“Detect. Verify. Protect.”

AI-powered identity verification

Fake document detection

Fraud risk scoring

Real-time screening

From Tasks
to Meaningful Value ✨

The Problem

Banking & financial services
Government services
Education admissions
Employment verification
E-commerce & KYC
Hostel/housing admissions

Our Proposed Solution

AI-Powered Multi-Layer Verification

Our system analyzes an identity submission through multiple AI layers:

Document → OCR → Authenticity Analysis → Face Verification → Identity
Consistency → Risk Score → Decision

The system produces:

Verified

Needs Review

High-Risk / Suspected Fraud

⚡ How the System Works

Human + AI ✨
Can Do Well

Document AI
Image Forensics
Face AI
Fraud Intelligence

Changing Job Landscape

Faster verification

Reduced manual workload

Early fraud detection

Explainable risk assessment

Scalable automated screening

Multilingual document support
Deepfake detection
Blockchain-based credential verification
Privacy-preserving AI
Federated learning
Government/API verification integration
Continuous fraud intelligence
Mobile-based verification

A Day at Work
in the Future

The background features a solid black field with two large, semi-transparent spheres. One sphere is in the upper left, and the other is in the lower right. They have a gradient of colors, primarily purple and blue, with some internal light patterns.

“Build a trusted digital identity layer where every document can be intelligently screened before
it becomes a source of fraud.”

Thank You

AI-Based Fake Identity & Document Screening System
Detect. Verify. Protect.
